

Candy Bar Cake

Ingredients

- 1 Box Devil's Food cake mix
- 1 Can Eagle Brand Sweetened Condensed Milk
- 1 Tub Cool Whip
- 3 Candy Bars of your choice (Hershey's Bar, Snickers, Heath Bar, even Reese's)

Directions:

Bake cake mix according to directions on the box. Right out of the oven, poke the cake full of holes and pour one can of Eagle Brand Sweetened Condensed Milk over it. Refrigerate until cake is completely cold. Once cake is chilled, spread Cool whip over cake and sprinkle 3 chopped candy bars of your choice over it. Keep refrigerated until ready to serve.

Note: I have found the longer it is refrigerated, the better it tastes. I usually try to do the cake and eagle brand steps the night before I plan to serve it. If making it all the same day, I will place it in the freezer for 30 min. to help it cool faster. Just don't want to forget it is in there!
